RATNESH DILIP RAMANE

DATA ANALYST | DATA SCIENCE INTERN

Chiplun, Maharashtra, India • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Final-year B.Sc. Information Technology student with practical project experience in Python-based web applications, data analysis and machine learning. Familiar with Python, SQL, Pandas, NumPy, Scikit-learn, Flask and MySQL, with hands-on exposure to data preprocessing, feature engineering, model evaluation and dashboard-oriented application development. Seeking an entry-level Data Analyst or Data Science internship opportunity to apply analytical and programming skills to real-world problems.

TECHNICAL SKILLS

Programming	Python, SQL, Java (academic exposure)
Data & ML	Pandas, NumPy, Scikit-learn, Matplotlib; data cleaning, preprocessing, feature extraction, model evaluation
Web & Database	Flask, HTML, CSS, JavaScript, MySQL, SQLite
Tools	Jupyter Notebook, Google Colab, VS Code, Git, GitHub

PROJECTS

Phishing URL Detection System | Python, Flask, Scikit-learn

GitHub: github.com/Ratnesh-coding/phishing-url-detection

- Developed a web application that classifies URLs as phishing or legitimate using machine-learning models.
- Used a public phishing URL dataset and built a URL-string feature extraction workflow for model training.
- Compared Logistic Regression, Random Forest and Extra Trees using a stratified train/test split and evaluation metrics.
- Implemented a Flask interface and prediction API to make model predictions accessible through a browser.

Personal Finance Tracker | Python, Flask, SQLAlchemy, SQLite, Chart.js

GitHub: github.com/Ratnesh-coding/personal-finance-tracker

- Built a personal finance web application to record and manage income and expense transactions.
- Implemented transaction creation, editing, deletion, category tracking, history filters and monthly budgets.
- Created dashboard summaries and visual reports, including cash-flow and expense-category charts.
- Used Flask with SQLAlchemy and SQLite, with optional MySQL configuration documented in the project.

Smart Farming Advisory System | Ongoing Academic Project

- Planning a simple web-based advisory platform for farmers in collaboration with Ratnasindhu Farmer Producer Company Ltd., Chiplun.
- Project focus is accessible agricultural information and practical guidance through a straightforward web interface.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) — University of Mumbai

Dr. Datar Science, Dr. Behere Arts and Shri. Pilukaka Joshi Commerce College (Autonomous), Chiplun, Maharashtra

Third Year (TY) • Expected graduation: 2027 • NEP 2020 curriculum

Semester-wise pointers shared: Sem I — 6.91 | Sem II — 7.52 | Sem III — 8.36 | Sem IV — 8.67

CERTIFICATIONS & VIRTUAL EXPERIENCE

- Data Analytics Virtual Internship — AICTE & VOIS for Tech University Engagement Program / Edunet Foundation (10 Aug–10 Sep 2026)
- Data Analytics — GeeksforGeeks SkillUp
- BCG X Generative AI Job Simulation — Forage (July 2025)
- Deloitte Data Analytics Job Simulation — Forage (June 2025)
- Tata Cybersecurity Analyst Job Simulation — Forage (May 2025)
- Introduction to Generative AI — Google Cloud course / Simplilearn SkillUp (June 2025)
- Crash Course on Python — Google / Coursera (May 2025)

ADDITIONAL

Career interests: Data Analytics, Data Science and Data Engineering. Open to internships and entry-level opportunities.
